## Notice: Vienna Residents

### New information about use of Norridgewock Transfer Station

Effective immediately there are important changes in the use of the Norridgewock Transfer Station

- Residents **MUST** have a sticker affixed to the windshield of vehicles in order to use the Transfer Station.  
You can purchase a sticker from the Town Clerk (Connie Smith) for \$2.50 (covers the cost of the sticker to the Town). The sticker will be effective for 1 year from date of purchase and you must provide the registration number for your vehicle.
- Norridgewock is now using Single-Stream Recycling.  
This means that you do not have to separate your recyclables into separate bags.
- The number of PLASTIC products that can be recycled has increased – basically all 7 types of plastic

- See accompanying “Single-Stream Recycling Guide” for specific instructions.

All other procedures at Norridgewock Transfer Station remain the same: residential use only, no trailers, you can take both trash and recyclables

**For now, there is NO change to curbside recycling procedures.** The “Single-stream” applies only to material you take to Norridgewock yourself. (The Selectmen are working on the options for changing the curbside recycling program as well – be patient. Meanwhile continue to separate them.)
